## ction 3 - Hazards Identification

Emergency Overview \*\*\*: Contents Under Pressure. Harmful if inhaled. May affect the brain or nervous system causing dizziness, dache or nausea. Vapors may cause flash fire or explosion. Harmful if swallowed. Extremely flammable liquid and vapor.

cts Of Overexposure - Eye Contact: Causes eye irritation.

cts Of Overexposure - Skin Contact: Prolonged or repeated contact may cause skin irritation. Substance may cause slight skin ition.

cts Of Overexposure - Inhalation: High vapor concentrations are irritating to the eyes, nose, throat and lungs. Avoid breathing vap lists. High gas, vapor, mist or dust concentrations may be harmful if inhaled. Harmful if inhaled.

cts Of Overexposure - Ingestion: Aspiration hazard if swallowed; can enter lungs and cause damage. Substance may be harmful llowed.

cts Of Overexposure - Chronic Hazards: Contains Titanium Dioxide. Titanium Dioxide is listed as a Group 2B-"Possibly carcinoge umans" by IARC. Significant exposure is not anticipated during brush application or drying. Risk of overexposure depends on durat level of exposure to dust from repeated sanding of surfaces or spray mist and the actual concentration of Titanium Dioxide in the jula.

C lists Ethylbenzene as a possible human carcinogen (group 2B). May cause central nervous system disorder (e.g., narcosis involves of coordination, weakness, fatigue, mental confusion, and blurred vision) and/or damage. Reports have associated repeated and onged occupational overexposure to solvents with permanent brain and nervous system damage. Overexposure to xylene in ratory animals has been associated with liver abnormalities, kidney, lung, spleen, eye and blood damage as well as reproductive rders. Effects in humans, due to chronic overexposure, have included liver, cardiac abnormalities and nervous system damage.

ther animal species (i.e., mouse and hamster) under similar circumstances and study conditions. Epidemiological studies of North prican workers show no evidence of clinically significant adverse health effects due to occupational exposure to carbon black.

on black is listed as a Group 2B-"Possibly carcinogenic to humans" by IARC and is proposed to be listed as A4- "not classified as an carcinogen" by the American Conference of Governmental Industrial Hygienists. Significant exposure is not anticipated during the application or drying. Risk of overexposure depends on duration and level of exposure to dust from repeated sanding of surfaces by mist and the actual concentration of carbon black in the formula.

nary Route(s) Of Entry: Skin Contact, Skin Absorption, Inhalation, Ingestion, Eye Contact

### ction 4 - First Aid Measures

- : Aid Eye Contact: Immediately flush eyes with plenty of water for at least 15 minutes holding eyelids open. Get medical attention NOT allow rubbing of eyes or keeping eyes closed.
- : Aid Skin Contact: Wash with soap and water. Get medical attention if irritation develops or persists.
- : Aid Inhalation: If you experience difficulty in breathing, leave the area to obtain fresh air. If continued difficulty is experienced, gelical assistance immediately.
- : Aid Ingestion: Aspiration hazard: Do not induce vomiting or give anything by mouth because this material can enter the lungs ar se severe lung damage. Get immediate medical attention.

## ction 5 - Fire Fighting Measures

h Point: -156 F LOWER EXPLOSIVE LIMIT: 0.7 % aflash) UPPER EXPLOSIVE LIMIT : 12.8 %

nguishing Media: Film Forming Foam, Carbon Dioxide, Dry Chemical, Water Fog

sual Fire And Explosion Hazards: Water spray may be ineffective. Closed containers may explode when exposed to extreme heat. ors may form explosive mixtures with air. Vapors can travel to a source of ignition and flash back. FLASH POINT IS LESS THAN 2 EXTREMELY FLAMMABLE LIQUID AND VAPOR! Keep containers tightly closed. Isolate from heat, electrical equipment, sparks a 1 flame. Perforation of the pressurized container may cause bursting of the can.

cial Firefighting Procedures: Evacuate area and fight fire from a safe distance.

## ection 6 - Accidental Release Measures

os To Be Taken If Material Is Released Or Spilled: Contain spilled liquid with sand or earth. DO NOT use combustible materials suc awdust. Dispose of according to local, state (provincial) and federal regulations. Do not incinerate closed containers. Remove all ces of ignition, ventilate area and remove with inert absorbent and non-sparking tools.

## ction 7 - Handling And Storage

dling: Wash thoroughly after handling. Follow all MSDS/label precautions even after container is emptied because it may retain luct residues. Avoid breathing vapor or mist. Use only in a well-ventilated area. Wash hands before eating.

age: Keep containers tightly closed. Isolate from heat, electrical equipment, sparks and open flame. Do not store above 120 ° F. St e quantities in buildings designed and protected for storage of NFPA Class I flammable liquids. Contents under pressure. Do not use to heat or store above 120 ° F.

## ction 8 - Exposure Controls / Personal Protection

i extraust verturation, or other engineering controls to control annothe levels below recommended exposure limits. Ose explosion-p illation equipment.

piratory Protection: A respiratory protection program that meets OSHA 1910.134 and ANSI Z88.2 requirements must be followed never workplace conditions warrant a respirator's use. A NIOSH/MSHA approved air purifying respirator with an organic vapor ridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure s.

ection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an ontrolled release, exposure levels are not known, or in any other circumstances where air purifying respirators may not provide quate protection.

Protection: Use impervious gloves to prevent skin contact and absorption of this material through the skin. Nitrile or Neoprene glovafford adequate skin protection.

Protection: Use safety eyewear designed to protect against splash of liquids.

er protective equipment: Refer to safety supervisor or industrial hygienist for further information regarding personal protective pment and its application.

ienic Practices: Wash thoroughly with soap and water before eating, drinking or smoking.

## ection 9 - Physical And Chemical Properties

ing Range: -34 - 999 F Vapor Density: Heavier than Air

r: Solvent Like Odor Threshold: N.E.

earance: Liquid Evaporation Rate: Faster than Ether

ıbility in H2O: Slight

size Point:N.D.Specific Gravity:0.798or Pressure:N.D.PH:N.A.

sical State: Liquid

section 16 for abbreviation legend)

## ection 10 - Stability And Reactivity

ditions To Avoid: Avoid temperatures above 120 ° F. Avoid all possible sources of ignition.

mpatibility: Incompatible with strong oxidizing agents, strong acids and strong alkalies.

ardous Decomposition: When heated to decomposition, it emits acrid smoke and irritating fumes. By open flame, carbon monoxide carbon dioxide.

ardous Polymerization: Will not occur under normal conditions.

pility: This product is stable under normal storage conditions.

## ction 15 - Regulatory Information

#### **CLA - SARA Hazard Category**

product has been reviewed according to the EPA "Hazard Categories" promulgated under Sections 311and 312 of the Superfund endment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following egories:

IEDIATE HEALTH HAZARD, CHRONIC HEALTH HAZARD, FIRE HAZARD, PRESSURIZED GAS HAZARD

#### RA Section 313:

F Hazard Class:

ed below are the substances (if any) contained in this product that are subject to the reporting requirements of Section 313 of Title I Superfund Amendment and Reauthorization Act of 1986 and 40 CFR part 372:

 mical Name
 CAS Number
